Mellissa Read-Devine

A kaleidoscope of harmony and empathy with the natural landscape.

Be captivated by the powerful immediacy and extraordinary colour emerging from Mellissa's paintings. They are visually spectacular and invite the viewer to search for further harmony and empathy with the natural landscape.

The recipient of many Australian art prizes, Mellissa's style is distinctive with her electric palette and layered application of brush strokes. These characteristics come together presenting unique representations admired by both Australian and international collectors alike.

"The process of painting is joy for me. Florals and landscapes are all around us and with them I never have to struggle for inspiration. I invite the viewer into my world to see contemporary scenes in rich optical mixes of brushstroke and hue".
